

## **A letter from Innocent Julius regarding her current situation:**

Hello!!!

This is Innocent Julius, first born son of Julius family.

I live in Mbewa village T/A mabuka, Mulanje district. Our family has 3 children, 2 boys and a girl.

Both my mum and dad are jobless. They didn't go further with education such that they are not qualified. It is very difficult for less educated people to get a job in our District and Nation too.

We depend on small scale farming just to earn a daily living.

Sometimes my dad can have piece work under tea field. Just like a contract of picking tea.

It's always difficult for them to get full fees for my studies.

During my primary school studies, I was leaning at Nansato Primary school. I successfully finished and selected for secondary school.

I am in form 2.

I like all subjects but feel boring with literature. I enjoy being taught with all teachers in our class.

I also like some education visits/school trips. We once travelled to Lengwe National park where we saw different wild animals.

In my free time, I like playing and watching football. I also like reading novels.

At home, I have my garden where I like to grow crops of my choice like maize, cassava, peas just mention a few and always practice good style of ridges.

After secondary school, I would like to study Agriculture. I always feel good for our community to be food secure. I wish to study more skills of agriculture.

I even sometimes dream to be awarded because of some new creativity in agriculture. I really hope that one day my dreams will come true.

Its my humble request for your consideration in supporting my studies. I will be happy if I can be considered.

Yours faithfully,

**Innocent**
